POSITIONING

I turn ambitious AI ideas into teams, systems, and measurable outcomes.

Hands-on engineering leader, founder, and systems architect with 9+ years leading AI, data, cloud, and enterprise delivery from discovery through production. Combines architecture depth with product judgment, executive communication, team direction, and commercial ownership.

FLAGSHIP AI SYSTEMS

ATHENA + HERMES

FOUNDER / SYSTEMS ARCHITECT

01

Governed intelligence for high-stakes human decisions.

Bi-temporal ontology, provenance, explainable signal paths, counter-evidence, role-calibrated surfaces, visible uncertainty, and human-final action across education and sports.

TabX Resolution Platform

LEAD SOFTWARE ENGINEER

02

Entity resolution at ~22.5M-record scale.

Deterministic resolution, embeddings, model verification, confidence thresholds, evaluation gates, and human review across .NET, React, Python, MCP, and SQL Server.

AI Operating Layer

FOUNDER / PRINCIPAL ENGINEER

03

One governed workspace across the modern toolchain.

Typed MCP infrastructure spanning GitHub, Linear, Microsoft 365, Google Drive, Cloudflare R2, transcription, billing, and institutional memory.

Royal Engineering Automation

FOUNDER / SYSTEMS ARCHITECT

04

Multi-week analysis compressed to minutes.

React/.NET/PDF/Excel pipeline processes up to 300 engineering model outputs per upload while improving QA/QC, accuracy, and scale.

0→1 PRODUCT

Discovery to production, with architecture, implementation, deployment, and operations owned end to end.

ENTERPRISE SCALE

Government ERP, cloud migration, regulated workflows, and multidisciplinary stakeholder environments.

FOUNDER JUDGMENT

Commercial scoping, delivery risk, product tradeoffs, client trust, and measurable ROI—not code in isolation.

9 + YEARS

Building production software since 2017.

EXPERIENCE

Dozier Tech Group / Founder & Principal Engineer

2025–Present

- Founded and lead a multidisciplinary delivery practice spanning engineering, project management, operations, sales, and specialist AI/infrastructure partners.
- Converted ambiguous operations into funded \$25K–\$42K programs with measurable outcomes, phased delivery, clear ownership, and adoption plans.

TabX / Lead Software Engineer

2024–Present

- Set architecture and technical direction for an AI platform resolving ~22.5M POS units across .NET, React, Python, MCP, SQL Server, embeddings, and human review.
- Translate product constraints into sequenced cross-repository work while protecting data quality, auditability, and production readiness.

MetVero / Founder & Systems Architect

2026–Present

- Co-founded MetVero and defined the product/architecture direction for ATHENA and HERMES across education and sports intelligence.
- Turned AI-governance principles—provenance, uncertainty, challengeability, and human-final action—into falsifiable product acceptance criteria.

CGI / Solutions Developer / Transition Co-Lead

2023–2024

- Co-led government ERP transitions across custom development, environment planning, deployment, QA, performance readiness, training, documentation, and stakeholder coordination.

Perficient / Associate Technical Consultant

2020–2022

- Shipped React enterprise onboarding tools; migrated and remediated .NET applications for Azure; built integration/smoke-test automation and Azure DevOps pipelines.

Meyer Technologies / Software Developer

2017–2019

- Built C#, .NET, JavaScript, API, data, and automated-test solutions for healthcare, marine transportation, and mobile workflows on a three-person team.

ADDITIONAL BUSINESS IMPACT

CONSTRUCTION AI

RAG and document intelligence connecting email, files, calendars, vendor history, SOPs, and project context.

10–20 hours recovered per person per project

CIVIL ENGINEERING

Five-module drainage, plan QA, compliance, and proposal-automation program.

Documented 80% time savings · \$42K engagement

EDUCATION + CREDENTIALS

B.S. Computer Science — University of Louisiana at Lafayette, 2019

Microsoft Azure Fundamentals · Microsoft Data Engineer Associate · CompTIA A+ · CompTIA Network+
